SUMMARY

Full-stack Developer with 1+ year building production websites for Australian and UK clients with TypeScript, Next.js, Strapi, NestJS and PostgreSQL. Takes projects from Figma designs through launch and ongoing maintenance, working directly with clients over Slack, ClickUp and Google Meet, and uses Claude Code with MCP to speed up day-to-day delivery. Currently building cloud architecture skills with AWS and Terraform.

SKILLS

Languages	TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3/SCSS
Front-end	Next.js, ReactJS, Tailwind CSS, Zod, Redux, Vite
Back-end & CMS	NestJS, Node.js, ExpressJS, Strapi, Prisma
Databases	PostgreSQL, Redis, MySQL, MongoDB, SQL Server
Cloud & DevOps	AWS, Terraform, Docker, GitHub Actions, Nginx
Coding Agents	Claude Code, Antigravity
Tools	Git, GitHub, Visual Studio Code, ClickUp, Slack

EXPERIENCE

Full-stack Developer, MOHA Software **Mar 2026 – Present**

Outsourced web projects for clients in Australia and the UK. Learning AWS hands-on with Terraform.

- Delivered 5 production websites for clients in Australia and the UK across health, infrastructure, retail and venture capital, from the first build through launch and ongoing maintenance
- Built responsive front ends from Figma designs with Next.js and Tailwind CSS, and CMS back ends with Strapi and NestJS, working directly with clients through Slack, Google Meet and UAT rounds
- Introduced Claude Code with MCP (Figma, ClickUp) into daily work, and built an AI review checklist from bugs found across past projects to catch repeat issues before release

READY.QUIT.SOLID – Galambila **Aug 2026 – Sep 2026**

Full-stack Developer | Next.js 16, TypeScript, Tailwind CSS, Strapi 5, PostgreSQL, HubSpot API | Pre-launch

- Main contributor on front end and CMS: built the Next.js site from Figma designs and designed the Strapi content models and APIs behind it
- Integrated HubSpot CRM so contact and newsletter sign-ups flow straight into the client's marketing tools
- Shipped client change requests (CRs) and deployed staging with Docker to the company's self-hosted server
- Optimised the website for speed, accessibility and SEO, reaching Lighthouse scores of 86–99 performance and 96–100 accessibility on every page, mobile and desktop

House Nine & Nine and Found – House Nine (UK) **Jul 2026 – Sep 2026**

Full-stack Developer | Next.js 16, TypeScript, Shopify, Tailwind CSS, NestJS, Prisma, PostgreSQL, Redis, REST API, Docker | housenine.co.uk | nineandfound.com

- Built features and client change requests (CRs) across 3 apps: 2 public Next.js sites (studio and Shopify store) and the NestJS + React CMS shared by both

- Developed the CMS admin: content editors, media library, and user and role management
- Integrated the Shopify Storefront API for product listings, filters and search

John Holland Corporate Website – John Holland Group **Sep 2026**

Full-stack Developer (maintenance) | Next.js, React, TypeScript, Strapi 4 | johnholland.com.au

- Monthly maintenance of the live site: bug fixes, small improvements and client change requests (CRs) across the Next.js front end and a Strapi CMS of 50+ content types

Flip The Vape – VAHS **May 2026 – Jun 2026**

Front-end Developer | Next.js 14, TypeScript, Tailwind CSS | flipthevape.com

- Turned Figma designs into a responsive front end that works across desktop, tablet and mobile
- Built reusable UI components shared across the national site and 8 state and territory subsites
- Built animated, interactive sections and delivered client change requests (CRs)

Landing Page – Hatch Quarter **May 2026 – Jun 2026**

Front-end Developer | Next.js 16, TypeScript, Tailwind CSS, Strapi 5 | hatchquarter.com.au

- Built 6 responsive pages plus the header, footer and mobile navigation from the design
- Connected the pages to the Strapi CMS and built interactive sections such as animated sliders
- Prepared the site for launch (client UI feedback, SEO fixes, sitemap) and kept maintaining it after go-live

Intern Software Developer, ADD Group **Jul 2025 – Dec 2025**

PROJECTS

Claude Code Skills – Coding Guide **In daily use**

Claude Code skills built from lessons learned on the projects above, used in daily work.

- Collected the bugs and mistakes that came up most often across those projects into a review checklist the AI agent checks every change against
- Automated the bug-fix workflow via ClickUp MCP: fix, self-review, open pull requests and report back, with human approval at each step

LoadForge – AWS Auto-scaling Playground **Sep 2026 – Oct 2026**

AWS (EC2 Auto Scaling, ALB, CloudWatch, ACM, SSM, IAM, GitHub OIDC), Terraform, NestJS, Next.js, TypeScript, Docker, k6, GitHub Actions | loadforge.quannh.xyz

- Provisioned the whole stack with Terraform: VPC, HTTPS load balancer, EC2 Auto Scaling with CloudWatch alarms, and keyless GitHub OIDC deploys
- Raised throughput from 26.7 to 39.2 req/s, cut health-check latency under load from ~20 s to 8 ms and scale-out time from ~3 minutes to 30–50 s

EDUCATION

Hanoi Open University (HOU) – Information Technology – Software Engineering **Dec 2022 – Jun 2026**

CERTIFICATIONS

IELTS – Overall Band Score 6.5 (December 15, 2025) – view

Front-End Foundation Developer – CyberSoft – view
